Geami WrapPak® M

Low volume
wrapping solution

NEW

Small footprint unit
Manual Edge

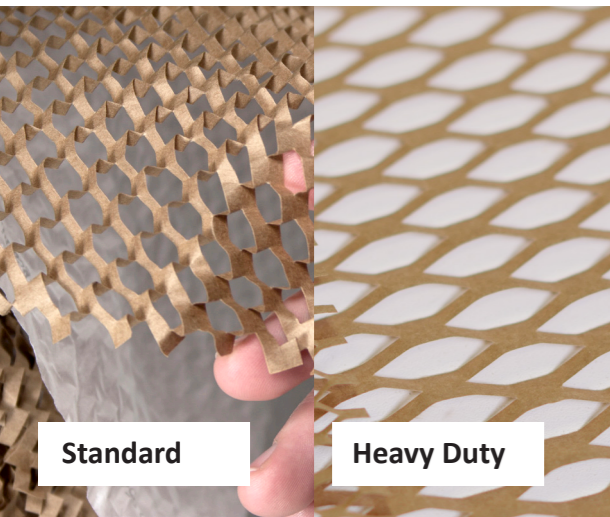

ABOUT THE SOLUTION

Geami WrapPak is the combination of a patented die cut kraft paper with a tissue interleaf.

The Geami WrapPak M expands the die cut paper into a 3D honeycomb structure. In combination with the tissue interleaf, it provides a unique wrapping product.

- + Excellent surface protection and great presentation
- + Both standard and heavy duty paper configurations available
- + Simple and easy packaging solution
- + No need for electricity
- + No need for tape due to interlocking paper structure

NEW

Standard

Heavy Duty

PACKAGING NEEDS

The Geami WrapPak M is ideal in lower volume packaging environments. As it is a manually operated unit, it increases flexibility. It can be placed anywhere without the need for electricity. In e-commerce environments where the main goal is to maximize ease of use while offering customers an attractive unboxing experience Geami WrapPak is the perfect solution.

HEAVY AND FRAGILE PRODUCTS TO WRAP?

Use the new **Heavy Duty** die-cut paper

Besides the standard die-cut kraft paper, a heavy duty die-cut kraft paper is now available to work in conjunction with the Geami WrapPak M and Geami WrapPak M Edge. Heavy Duty die-cut paper distinguishes itself by the large honeycomb cells. The cells have twice the size of the standard die-cut paper cells resulting in outstanding protective performance. That makes it very suitable for wrapping products that need more than average surface protection like products in the industrial segments as well as high-end heavy products within the homeware segment.

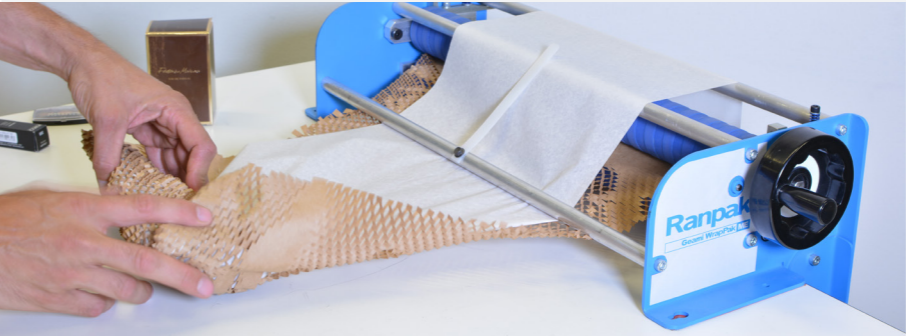

- 1. Outstanding protective performance
- 2. Cost efficient due to reduced paper usage
- 3. Time efficient due to less handling involved

NEW

NEED TO SAVE SPACE?

Apply the new **Manual Edge**

The Geami WrapPak M Edge is part of the manual product line that is a great solution for pack stations with limited space. The unit can be placed at the back end (edge) of the packing station, keeping the work area free for other activities. Both standard and heavy duty paper can be used in conjunction with the Geami WrapPak Edge.
