

For efficient, economical bale handling.

Efficiently and economically handle nearly any type of baled product.

APPLICATIONS

Cascade bale clamps can efficiently and economically handle nearly any type of baled product including cotton, and synthetic textile bales, corrugated, newsprint, rag, hay, metal and other scrap bales.

FEATURES

- Proven, durable arm and aluminum frame construction ensuring long, useful life of the clamp
- Superior arm-slide material and design for extended bearing life
- Low profile frame for visibility over the clamp
- Thin arm profiles for handling in between tightly spaced loads
- Regenerative hydraulic valving for optimal arm speed
- Revolving models available for load inverting

OPTIONS

- Custom opening ranges
- Custom arm sizes
- Custom arm ribbing
- Various mounting classes available
- Quick-change lower hooks
- Load backrests

① Premier model for cotton industry. Button facing available.

② Integral arms.

③ Vertical mount (0° mounting angle) is recommended for lift heights exceeding 180".

► Rotator speed: 5.2 RPM @ 15 GPM.
Rotator torque: 65,000 Inch-Lbs. @ 2,000 PSI.

- ① Integral arms.
- ② Vertical mount (0° mounting angle) is recommended for lift heights exceeding 180".

▶ Rotator speed: 4.5 RPM @ 15 GPM.
Rotator torque: 65,000 Inch-Lbs. @ 2,000 PSI.

INSTALLATION KITS

Model	Catalog Order No.
Revolving	672442

HYDRAULIC FLOW AND PRESSURE

Model	Minimum	Recommended	Maximum	Max. Pressure
35D & 50D BCR	5 GPM	10 GPM	15 GPM	2,300 PSI
70D BCR	7 GPM	12 GPM	15 GPM	2,300 PSI

MOUNTING CLASS INFORMATION

Mounting Class	Truck Capacity
II	2,000-5,500 lbs.
III	6,000-10,000 lbs.
IV	10,001-17,500 lbs.

HYDRAULIC FUNCTIONS

Model	Hydraulic Functions	Truck Auxiliary Valves Required
Revolving	2	2

Narrow Closing Range

For narrower than standard closing ranges, add to list price of standard clamp as follows:

Model	Frame Width	Opening Range
25D	34"	6.5"-41.7"
35D	37"	6.0"-45.2"
50D	40"	6.3"-47.3"
70D	48"	8.2"-60.0"

Hydraulic Flow Control Valve

Allows attachment operating speed to be adjusted for maximum efficiency by regulating hydraulic flow from truck auxiliary system. Also prevents overheating and excessive pressure drop. Requires a direct line to tank.

Flow Required	Catalog Order No.
3.5 GPM	207496
5 GPM	207497
7 GPM	207498
10 GPM	207499
12 GPM	207500

180° Rotation Stop Group (Factory Installed)

A 180° Rotation Stop Group is used when the load is repeatedly rotated in the same 180° cycle and a permanent rotation stop point is desired. A hydraulic shut-off decreases rotation speed just prior to the mechanical stop point.

Single Pressure Setting Relief Valve

Limits hydraulic pressure in one line to attachment. two valves required per auxiliary function.

Catalog Order No.

661674 (2-20 GPM)

685968 (20-50 GPM)

Bi-Directional Pressure Relief Valve

Allows single valve to be used for each auxiliary function to limit hydraulic pressure to attachment.

Catalog Order No.

677379
