

# PDP5000 - Power Distribution Panel

The PDP5000 is a modular power distribution panel that is mounted directly to Sackett Systems' stands at the factory

Reduce the number of conductors pulled from the main panel from one per charger, to one per stand

## BENEFITS

- Reduce battery room electrical installation costs
- Easier and quicker battery room electrical installations
- Less wire to pull, smaller conduit to install
- Less weight and stress due to fewer conductor cables
- Smaller main distribution panel - circuit breakers in distribution panel vs. main panel
- Isolated circuits for quicker and safer trouble shooting; eliminate need for individual disconnects

- **Safer**
- **Lower Installation Costs**
- **Easier Maintenance**

## FEATURES:

- Panel accepts one 3-phase 480V cable and distributes power to 4, 6 or 8 chargers
- All components carry the UL label
- Industrial UL 489 Circuit Breakers
- 600V rated stranded industrial wire
- Twist lock connectors
- UL approved
- NEMA 4 & 12 rated enclosure

## OPTIONS

- Lockout / Closeout
- Plexiglass safety cover
- Thumb screw locks
- 20 Amp or 30 Amp Breakers
