

Patented Slip Resistant Cover for a Wide Variety of Loads

PATENTED

Easy to manually install or remove in seconds

Sticks securely to forks

Black rubber upper layer, a metal inner core and a bottom magnetic layer

Rib design provides additional coefficient of friction

Easily store on side of the lift truck when not in use

APPLICATIONS

Cascade Magnetic Fork Covers - DAGS are ideal for handling a wide variety of loads. Designed for use in any industrial sector where palletless products could be damaged from contact with bare forks. Developed for the painted metal and aluminium industry, DAGS protect surfaces which are subject to scratching or wear, including powdered metal surfaces, anodized aluminium or wood products. When confronted with an awkward or slippery load like barrels, metal boxes or cages, the lift truck driver can install the covers on the forks in a matter of seconds, improving stability and decreasing the chances of the load slipping off the forks.

OPTIONS

- Many different lengths to accommodate most forks.
- Available with Edge Guard.
- Special models available for telescopic forks.

FEATURES

- Easy to install or remove in seconds without any mechanical or electrical work.
- Sticks securely to forks.
- 70 durometer (shore A) black rubber upper layer, a metal inner core and a bottom magnetic layer.
- Resistant to abrasions, atmospheric agents and oil.
- Rib design provides additional coefficient of friction.
- Stores within easy reach on any flat surface on the forklift.
- Lightweight– does not limit truck's net capacity.
- Improves noise reduction.
- The magnetic field generated by the DAGS does not interfere with other electronic instruments.
- Can be used anywhere extra protection is needed between a metallic surface and the load.
- Temperature range from -30°C to +140°C.

Catalogue Order No.	Width	Length	Thickness of DAGS (mm) T	Weight (per pair) kg
Covers Blade and Part of the Shank
